

Power Pole Modifications

Measurement and Photo Guide

In order to accommodate for your Power Pole cutout, we will need the following photographs and measurements:

Take a photo showing the whole back (aft section) of the boat.

Check One: Transom Mount
 Engine Bracket Mount

1. Distance from the side of the motor to the side of the Power Pole.

Measurement (in inches): _____

2. Distance from the side of the Power Pole to the outside edge of the boat.

Measurement (in inches): _____

3. Distance from the rub rail to the side of the Power Pole.

Measurement (in inches): _____

Take a photo showing the port/starboard side where the Power Pole is located. If you have dual Power Poles, be sure to take photos of both the port and starboard sides.

Please email all completed Power Pole Modifications: Measurement and Photo Guide forms, along with the requested photographs, to design@laporteproducts.com.
